GWP PACKAGING MALAYSIA SDN BHD

Your Ultimate Partner in Total Direct to End Line Packaging Systems

About Company

Formed in 1999, GWP Packaging Malaysia Sdn Bhd (formerly known as Great Wall Packaging Supplies since 1991) is a total direct to end line packaging machineries trading company which has progressed steadily earning a reputation as one of the leading suppliers in the industry.

We offer the convenience of a one-stop-station for all packaging needs. We provide preventative maintenance, equipment service and repairs and a full spare parts inventory for all the equipment we supply.

Our products, systems and services are continuously meeting the needs of customers across a broad spectrum of applications & industries.

GWP has been in the forefront of major packaging innovations and technical excellence renowned all over the Malaysia, and we are one of the most reputable packaging materials & systems supplier in Malaysia.

You can be extremely confident in choosing **GWP PACKAGING MALAYSIA SDN BHD** as your equipment supplier, not only will you be supplied with the best equipment and materials of its kind, but also can be equally sure of an excellent service partner at all times to cater your ultimate packaging requirements.

4S

SALES

Experience the excellence of our sales expertise, tailored to meet your industrial requirements, offering a wide range of top-quality packaging machinery and materials.

SERVICE

Utilizing our expertise in packaging machinery, we offer technical services to expertly address any challenges you may encounter in the realm of packaging, ensuring seamless solutions to your packaging needs.

SPARE PART

Discover the one-stop-shop for all your packaging machinery needs! We are the only supplier with a wide range of spare parts readily available for your convenience. You can even make retail purchases with us. You'll benefit from an extra layer of confidence knowing that you have a resourceful and dependable packaging machinery specialist at your service.

SOLUTION

Excelling in crafting tailored turn-key packaging solutions to meet each customer's unique requirements, we take pride in delivering top-notch professional services for designing and constructing comprehensive packaging machinery lines, including fully automated projects for various industries.

AUTOMATIC CUP SEALER MACHINE

Automatic cup sealing machines offer advantages such as increased productivity, consistent and hygienic sealing, user-friendly operation.

Features:

- Simple to use, economical cup sealing machine for sealing of standard PP Cups.
- Widely use at food & beverage outlets.
- Compact size with user friendly operational interface.
- Auto lifting of cup for easy loading & unloading.

Technical parameter:

Power : 220v
Capacity : Approx. 350pcs/hour
Max cup size : Dia. 40mm ~ 90mm

AUTOMATIC CAN SEAMING MACHINE

With its sleek and trendy design, our PP / PET Cans Seaming Machine is specially crafted for effortless seaming with Alu Lid Caps. Anyone can operate it with ease - just one press of the start button completes the seaming circle automatically, halting at the home position. The added safety cover and modern LED lighting enhance its stylish appeal.

- Perfect for any type of beverages (Coffee, Bubble Tea, Tea of all kinds, Beer & etc)
- Seal with aluminium lid for perfect safety & leak proof
- Trendy & up market design for your beverages
- Recommended for cafe, take away packing, pre-made beverages, draught beer & etc

LID OPTION

VACUUM PACKAGING MACHINE

Wide range of vacuum packaging machine for different applications. From household usage to GMP standard factory, we will have the right machine for you.

- Portable vacuum packaging machine
- Single / double chamber vacuum packaging machine
- External nozzle vacuum packaging machine
- And many more

SKIN VACUUM PACKAGING MACHINE

There are many advantages using skin vacuum packaging machine.

- Improve product presentation
- Extend shelf life
- Improve product safety
- And many more

VACUUM THERMOFORMING PACKAGING MACHINE

Vacuum thermoforming packaging machine offer a combination of cost-effectiveness, design flexibility, quick production cycles, and scalability, making them a popular choice for many industries in the manufacturing sector.

ALUMINIUM TRAY SERIES

The application of high end aluminum foil container sealing machine and sealable container

- **Food and beverage industry:** Airline catering, fast food delivery frozen cooked food, etc.
- **Baking industry:** Frozen dough, frozen cakes, moon cakes, western desert, flaky pastry jam and honey.
- **Food industry:** Top grade tonic, normal temperature food, meat, fish, seafood, flavours, hot pot sauce, tea, pet food.
- **Other products require strict sealing.**

HAND PRESS SEALING MACHINE

FOOT PRESS SEALING MACHINE

We carry full range of sealing machines to cater different industrial needs.

From portable hand sealer to heavy-duty foot press sealer. We have the right machine to solve your production needs. Our range of sealer utilise different technology (constant heat, impulse system, ultrasonic & etc) for different usage & material.

Your Ultimate Partner in Total Direct to End Line Packaging Systems

CONTINUOUS SEALING MACHINE

Suitable for higher volume production where the sealing, cooling & date coding can complete in continuous motion using just 1 machine.

Customer can opt for either horizontal or vertical machine orientation based on their product characteristic.

Example: Vertical orientation machine most suited for sealing of liquid product in pre-made pouch format.

CONTINUOUS SEALING MACHINE WITH AIR FLUSH FUNCTION

- Compact footprint & combination of advance function
- Built-in gas flush & vacuum function
- Comes with date coding
- Robust & beautiful finish with full stainless steel machine body

SEMI-AUTO SHRINK PACKAGING MACHINE

Shrink packaging machines provide a range of benefits, including product protection, versatility, visual appeal, tamper-evident packaging, cost-effectiveness, increased productivity, customization options, and space-saving storage. These advantages make shrink packaging a popular choice for various industries seeking efficient and attractive packaging solutions.

AUTOMATIC SHRINK PACKAGING MACHINE

Automatic shrink packaging machine have the advantage of producing much higher volume with lesser manpower. Aside from that, it also can be connected in-line with primary packaging machine to receive the goods to directly seal & shrink pack the product in a continuous line, further eliminate human touches and able to ensure the goods are well protected.

FILLING MACHINE

Filling machine for liquid or product with high viscosity

- High accuracy
- Fast filling speed
- Able to do high volume filling
- By piston filling or weighing measuring
- Reduce of manpower

LABELLING MACHINE

With the usage of labelling machine, it will greatly reduce the complexity of the task as well as guaranteeing high output with good consistency on the result.

Labelling machine can overcome various issue;

- Production speed
- Consistency of sticker label alignment
- Avoid air bubble in sticker label

AUTOMATIC VERTICAL FORM-FILL-SEAL PACKAGING MACHINE

Vertical Form-Fill-Seal also known as “VFFS” is a type of packaging machine that can automate the process of forming a bag or pouch, filling it with product, and sealing it. It is widely used in the food, pharmaceutical, and consumer goods industries for packaging various products such as powders, granules, liquids, and solids.

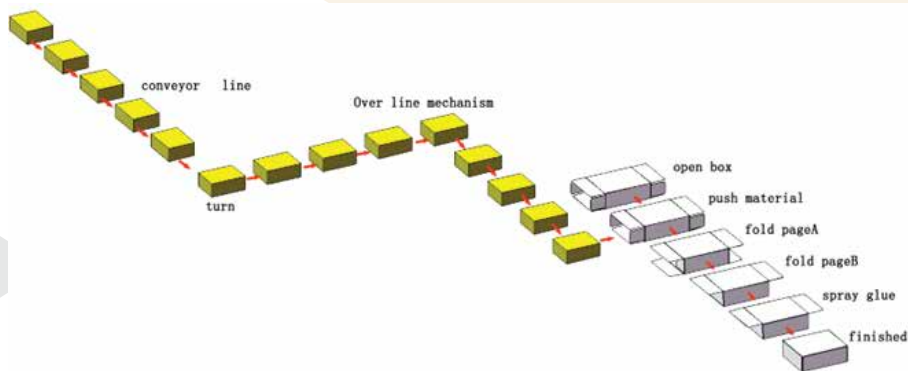

Bag type(s):

- Pillow bag
- 3 side seal bag
- 4 side seal bag
- Stick pack
- Gusset bag and many more...

AUTOMATIC CARTONING MACHINE

Automatic cartoning machine is a type of packaging machinery that is used to automatically form and seal cartons using various methods (hot melt adhesive, fold & tuck in and etc). These machines are commonly used in industries such as food, pharmaceuticals, cosmetics, and consumer goods for packaging various products into cartons or boxes.

STRAPPING MACHINE

Strapping machine commonly used for bundle or reinforce packages, cartons, or palletized loads with PP or PET strap.

There are several types of strapping machines, namely manual, semi-automatic and automatic.

AUTOMATIC CARTON ERECTING MACHINE

Automatic carton erecting machine has few key benefits.

- High speed & efficient
- Save of floor space
- Consistently produces well-formed cartons with minimal errors
- Seamless integration with downstream packaging machineries

CARTON SEALING MACHINE

Carton sealing machine is a very versatile packaging machine. It can work alone or connect with various other packaging machineries to enhance your production capability.

- Increase efficiency
- Save of floor space
- Cost saving
- Consistency in carton sealing quality

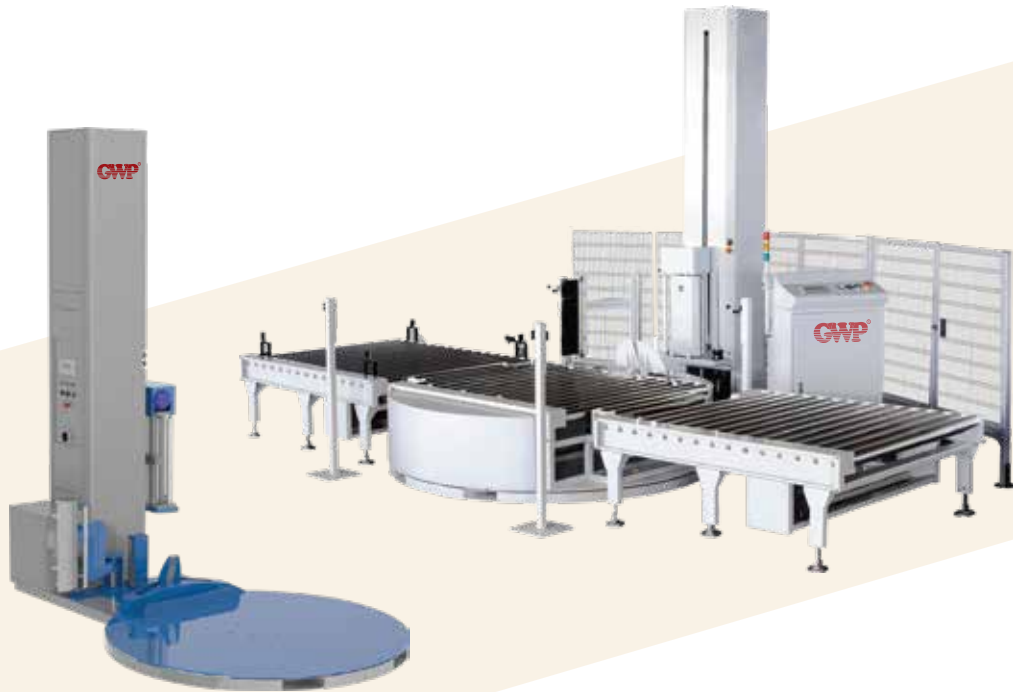

STRETCH WRAPPING MACHINE

Stretch wrapping machine is essential for businesses involved in logistics, warehousing, manufacturing, and other industries, as it helps secure and protect products during transportation or storage.

Types of stretch wrapping machine available;

- Semi-auto pallet stretch wrapping machine
- Automatic pallet stretch wrapping machine
- Fully automatic pallet stretch wrapping machine with conveyor system
- Rotary arm stretch wrapping machine
- Orbital stretch wrapping machine

TURNKEY PROJECT SOLUTION
